Mechanically actuated 3/2-way spool valve with mechanical spring. All ports are on the side of the valve.

If pressure is applied to port 1 the function is normally closed.
If pressure is applied to port 3 the function is normally open.

The use of the ports is interchangeable.

Exhaust can be throttled.

Valves can be used for technical vacuum too.

Heavy-duty 3/2-way roller-lever spool valve with mechanical spring, offering high air flow. Lever-construction has proven capabilities in rough environmental applications for decades. Lever is made from zinc plated steel.

If pressure is applied to port 1 the function is normally closed.
If pressure is applied to port 3 the function is normally open.

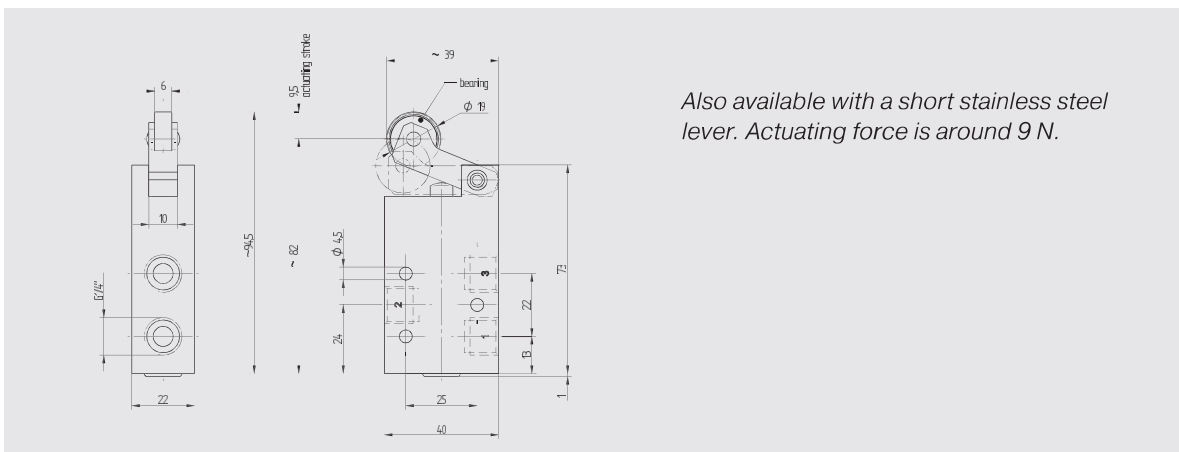

The use of the ports is interchangeable.

Exhaust can be throttled.

On request:
Roller-lever valves with idle return.

Low temperature version:
In this case the ports are not interchangeable, standard: Pressure at port 1 = normally closed, normally open version to be ordered separately.

Valves can be used for technical vacuum too.

Also available with a short stainless steel lever. Actuating force is around 9 N.
